WEATHER OF CONCERN

Weather of Concern

- The National Weather Service has issued Fire Weather Watches across Northern California beginning 09/23/17 due to lowering humidity values and periods of gusty northeast winds.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

High pressure over the Pacific NW will remain in place for a few more days. This will generate light to moderately strong, gusty N to NE winds with low daytime RH and poor to moderate overnight RH recovery in the Sacramento Valley/Surrounding Foothills and portions of the Bay Area and Mid Coast to Mendocino PSA's. This will lead to a marginal "High Risk" event of Significant Fire Potential for the Sacramento Valley and Surrounding Foothills Monday into Tuesday and increase Significant Fire Potential in portions of the other areas mentioned. Peak wind gusts during this event will be 20-30 mph at times in and around the Sacramento Valley today through Tuesday morning, and minimum RH will likely range from about 12-18%. Late Wednesday the high will begin shifting inland and a weak low pressure trough will arrive Friday. Dry, mild weather will remain in place all week in spite of that trough arriving late in the week.

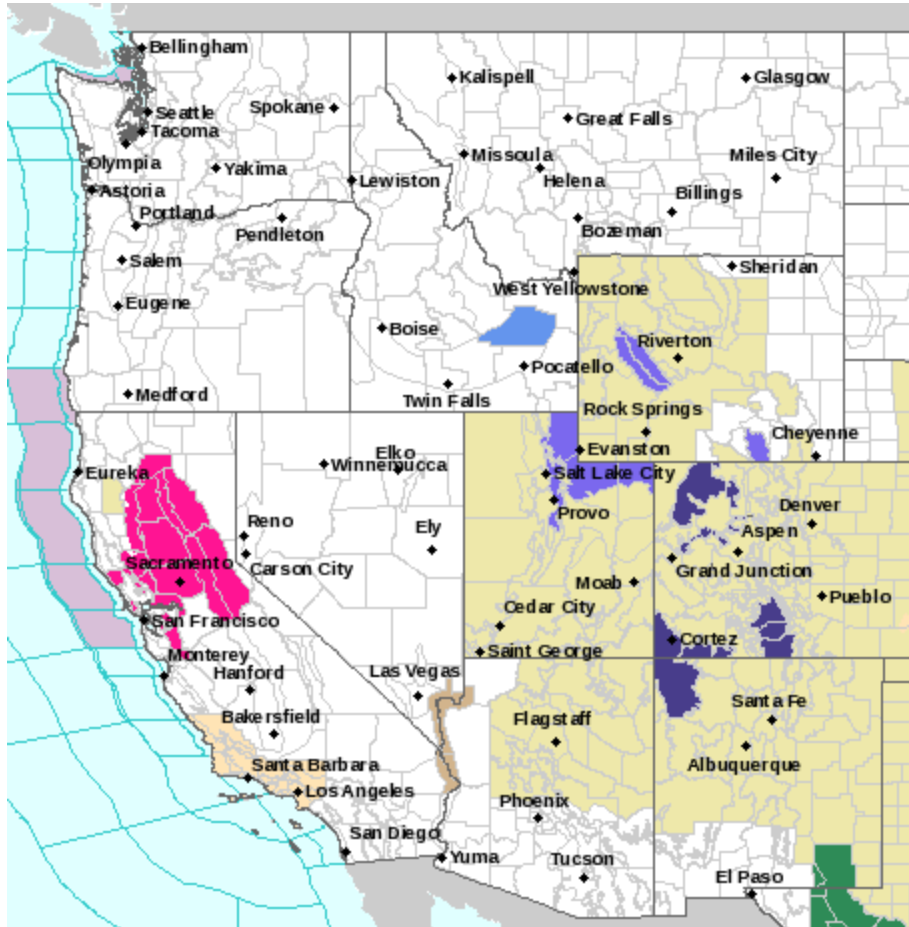

Temperatures will be warming to around normal values or slightly above early this week and remain there (low 90's warmest inland valleys). Lowest afternoon RH will largely be around 15-20% much of the week. Lighter winds are expected starting Wednesday.

SOUTHERN CALIFORNIA

High pressure approaching the West Coast from the Pacific will bring a warming trend along with minimum humidity in the teens to the region through next weekend. Maximum temperatures will warm to near or a little below normal today, with 60s to low 70s across the mountains and upper 70s and 80s in the valleys. Temperatures will approach 100 degrees across the valleys of Southern California by next weekend. North to east morning winds of 15 to 25 mph with gusts to 40 mph will surface across the mountains and below the canyons and passes of Southern California Monday through Wednesday. Otherwise, light offshore flow will occur across the region through next weekend.

Cal OES LAW ENFORCEMENT MISSIONS

Closed Cal OES Law Missions

- **2017-LAW-38999, 09/23/17 at 0900 hours**, the Monterey County Sheriff's Office (MCSO) reported they had an active search and rescue mission for a missing 37 year old female hiker. The missing person was last seen at approximately 1700 hours the previous evening in the Arroyo Seco campgrounds, Monterey County. Search teams deployed overnight had not yet located the missing person. MCSO requested a single tracking canine team to assist in the search. Two CARDA canine teams were deployed to assist. At 1025 hours, MCSO reported the missing person had been located uninjured, cancelled the resource request, and the CARDA teams were recalled. **Mission Closed.**
- **2017-LAW-39103, 09/23/17 at 1818 hours**, the International Emergency Response Coordination Center (IERCC) reported a SPOT device activation plotting to the Pacific Crest Trail at an intersection with Fish Creek in Fresno County. The registered owner (RO) of the device messaged that he activated it on behalf of a 28 year old hiker with a compound fracture of one ankle, a probable fracture of the other, and a head wound. Fresno County Sheriff's Office was notified, however, their SAR team was training in a remote area and was not immediately available. CHP aircraft was unable to fly the mountainous terrain after dark. LDO contacted AFRCC, who assigned an immediate response mission to NAS Fallon. An H-60 rescue helicopter launched from NAS Fallon, located the victim and hoisted her out. She was flown directly to the trauma center in Fresno and the mission was successfully concluded at 0150 hours. **Mission Closed.**
